

MEET ME IN THE MOONLIGHT

(By Swan Tichborne)

Will you meet me in the moonlight,
When everything is so bright;
Will you meet me in the moonlight,
Where there's no one to be seen;
And I'll kiss you, darling,
When the stars are twinkling bright.
For love seems always sweetest
In the pale moonlight.

Will you meet me in the moonlight,
And I'll confide in thee
A secret that has never been told,
As 'tis only known to me.
So promise that you'll meet me
Beside the stile tonight,
And I'll breathe to you the secret
In the pale moonlight.

"Tis how I love to love you,
And to hear your loving sigh;
To touch your dewy lips with mine
And seal it in the moonlight.
To lovingly embrace you,
In the solitude of night,
When two hearts will be united
In the pale moonlight.

When I meet you in the moonlight
There's a feeling near divine,
As I gaze into your eyes and clasp
Your little hand in mine,
And gently whisper in your ear
That you mean all to me;
And seal it in the moonlight
To love but only once.

With just the moon to witness,
And He who rules above;
How sweetly and how tenderly
We'll seal our vows of love
With kisses and caresses true,
When everything is right,
And I've won the one that won me,
In the pale moonlight.

SALT HIGHWAYS ARE CONSTRUCTED WITH GOOD RESULT

Construction of hard, durable road surfaces, using a mixture of gravel, clay and salt, looms up as one of the important highway-building developments in the immediate future.

In Alberta recently was one of the leading Canadian authorities on the subject, R. M. Rowat, development manager of the Salt Division Canadian Industries Limited. While emphasizing that the development of stabilized roads should still be considered in the experimental stage, Mr. Rowat said a number of test stretches had been built in Ontario with good results.

In the United States there are now over 200 miles of these salt highways existing in Ohio, Michigan, Indiana and Illinois and New York.

"Naturally the low cost of construction is the important factor," Mr. Rowat commented when interviewed "combined with the fact that the materials required are all generally available in Canada. Gravel can be substituted for gravel when local conditions make that preferable. The method followed in building the test stretches of these roads has been to create a hard wearing course not less than three inches thick. The clay acts as a binder and in laying the surface, it is mixed with water, much like concrete. In fact, because of its resemblance in appearance its resistance to abrasion, the complete mixture is sometimes referred to as 'soil concrete.'"

Mr. Rowat said that the exact costs of this type of highway construction would vary according to the locality where they are built. The costs for material were, generally speaking, secondary to local labor and haulage costs. In Ontario a good stabilized road 20 feet wide, had been built using 15 tons of common salt to a mile and with the other materials practically available at the roadside.

"We believe that this type of road surface will also mean greatly reduced maintenance charges," he stated. "It is so soon to try to calculate these exactly but we do know, for instance, that the maintenance cost on average Ontario gravel roads where there is considerable traffic run as much as \$600 per year per mile. The maintenance costs of paved highways are, of course, much greater. The results we have checked to date on stabilized roads indicate that these costs can be very materially lessened."

Both the public demand for elimination of the dust nuisance, especially in sections where the tourist trade is important, and the desire for improved traffic arteries, have stimulated the development of this new discovery in roads.

The English channel was one of Europe's rivers, long ago, with various French streams for branches.

A man entered a druggist's shop in Aberdeen, bought a tooth brush and went out without waiting for his change. The druggist was an honest man, however, and to attract his customer's attention he rushed to the window and rapped on it with a sponge.

1936 VILLAGE COUNCIL HAS 1ST MEETING

Officers are Elected for Year 1936

GARRETT IS MAYOR

The first meeting of the 1936 Village Council was held last Monday, February 17th, with Councillors Garrett, Flaws and McQuade present. The first business of the new Council was to elect the various officers for the year and this was done with the following results:

Mayor, S. J. Garrett.
Sec.-Treas., Alex Reid.
Auditor, John Atkinson.
Medical Health Officer, Dr. G. L. McFarlane.

The time set for the meeting of the council was the first Monday night in each month.

The matter of the 1936 assessment was discussed and it was decided to adopt the previous assessment for Village property taxes, with a new assessment of all new properties.

The question of dog taxes was also discussed and the council decided to draw up a new by-law for the licensing of dogs within the Village. This is now in preparation and will be presented at the next meeting.

Dray licenses were set at the same as last year, \$15.
A few accounts were presented for payment, and with no further business the council adjourned to meet again on Monday, March 2nd.

SOUTH AFRICAN WHEAT PRICES

While South Africa is not suited to wheat growing the farmers of that country have been encouraged to produce that grain through the fixing of a minimum price in 1931 by the government. This gave farmers a minimum of around \$1.38 a bushel and consequently production has increased. However, in 1935 a large crop was raised which produced a surplus of about 600,000 bags above the domestic requirements of 4,500,000 bags. What to do with the surplus has been troubling the government and domestic production has increased. South Africa has raised in 1931 when a total of 4,114,000 bags was harvested. As late as 1928, South Africa imported nearly 7-1/2 million bushels of wheat. Now she is numbered among the exporters.

It was then not confronted with unemployment, staggering interest and man-made depression. We might well ask ourselves why have conditions changed? and why is it necessary to seek a new form of government, or an economical change?

If you will come back with me to Ontario 20 years ago you will find conditions remarkably different. There was in the older countries; the home place has been divided and sub-divided among the family, until the farms are so small that they are no longer a garden patch. People with large families realized that conditions were very unattractive to them and consequently they moved west. This was the main reason that brought my father and mother to this country, for it was then still in the North West Territory. It was not the desire to pioneer or seek gold, as was the case in '88 when the great rush of people moved to the Pacific Coast. And by a steady stream of people coming west, it relieved the congested situation in the east for the time being.

But conditions have changed, the land has been filled in by the great numbers from the old land—and now the great west has gone and we can no longer push our surplus population out to seek their fortune in the great expanses of the unknown—and we have had for over increasing population that can no longer find room for expansion. Our system has also changed; Man power no longer is the

VICTOR R. HAWKINS ELEVATED TO POLICE MAGISTRATE

We were informed on Tuesday that Victor R. Hawkins, formerly Justice of the Peace at Carbon, had been elevated to the position of Police Magistrate. By Order-in-Council No. 225-36, passed in the Legislative Assembly on February 18th, Mr. Hawkins was elevated to the position of Police Magistrate, and on Tuesday, February 25th, he took the oath of office before S. F. Tornance, a Commissioner for South.

Mr. Hawkins is to be congratulated on his promotion to this important office.

EUROPEAN CROP CONDITIONS ARE NOT FAVORABLE

The European continent has been remarkably lucky in the way of having favorable weather for grain crops during the past few years. This has resulted in large yields of good quality grain. During the present winter, however, weather has not been as propitious as in the immediate past years. The greater part of Europe experienced an open winter with mild weather and frequent mists. Of late, however, the weather has changed to the stormy variety and a cold wave has swept most of the continent. This suggests crop damage as mild weather has been changed to a cold wave where it is susceptible to a cold wave.

E.P. Foster Speaks in Debate On Speech From Throne in Legislature

(Continued From Last Week)

In the portion of Mr. Foster's speech, which appeared last week, he dealt with the issue of Social Justice due to the efforts of the Premier, Mr. Abernethy. This week he goes on to deal with the cause, etc. of conditions.

"If we revert back 20 years to the time when the Liberals held the power in this province, we find it conditions for the sake of power to govern the people. The west was then in its infancy and the government was looked upon as a body of men entrusted with the power to govern. It was not a matter of money and judgment from our provincial debt that government was very efficient, because they were successful in building up the staggering debt of between 50 and 60 million dollars. The west was expanding and money was readily obtainable. The money was not interest-free, but was eager to loan to a young province, backed by millions of dollars worth of unexploited natural resources, fast filling up with a progressive people.

They were then not confronted with unemployment, staggering interest and man-made depression. We might well ask ourselves why have conditions changed? and why is it necessary to seek a new form of government, or an economical change?

If you will come back with me to Ontario 20 years ago you will find conditions remarkably different. There was in the older countries; the home place has been divided and sub-divided among the family, until the farms are so small that they are no longer a garden patch. People with large families realized that conditions were very unattractive to them and consequently they moved west. This was the main reason that brought my father and mother to this country, for it was then still in the North West Territory. It was not the desire to pioneer or seek gold, as was the case in '88 when the great rush of people moved to the Pacific Coast. And by a steady stream of people coming west, it relieved the congested situation in the east for the time being.

But conditions have changed, the land has been filled in by the great numbers from the old land—and now the great west has gone and we can no longer push our surplus population out to seek their fortune in the great expanses of the unknown—and we have had for over increasing population that can no longer find room for expansion. DR. P. H. McNICHOIL, SON OF LOCAL MINISTER PASSES AT MEDICINE HAT LAST FRIDAY

Word was received in Carbon last Thursday evening by Rev. Wm. McNichol that his son, Peter, who has been ill at his home in Medicine Hat for several weeks, was very low, and immediately Rev. and Mrs. McNichol left for the southern city, but Dr. McNichol passed away before his father could see his boddy.

The following report of the funeral was clipped from The Calgary Albertan:

"Funeral of the late Dr. Peter H. McNichol was held in Medicine Hat Sunday afternoon (Feb. 23) with crowded services at the Masonic Hall and St. John's Church where the Rev. M.S. Blackburn officiated. The late Dr. McNichol, 45 years of age, well known over the entire province, died Friday morning after an illness of several weeks.

Born in Jacksonville, N.J., he came to Canada in infancy with his parents and had been a resident in Alberta for about 14 years, residing near Carbon for a time before settling near the dental corps. A dentist for 23 years, he was a former president of the Alberta Dental Association and was the secretary of the Medicine Hat district on the board of directors of that body at the time of his death.

A life-long sports enthusiast, he was fond of shooting, golf and curling, and for several years was well known as a hockey referee at Medicine Hat.

prominence factor in the cultivation of the land and machinery now has taken its place; farms that used to employ eight to ten men, now with the use of a modern tractor employ two—the boss and the hired man—and the other six or eight must stand idly by, or find their way into the relief camps, but had no discontent.

Now if the machine can be made to operate more cheaply, by all means, use the machine, but the men and women thrown out of employment by its introduction should share the profit which that machine produces. It was the introduction of machinery and the throttling of credit which has caused the trouble. The land is held on the large portion of the people. These valuable machines are not the invention of the manufacturer operating them, but of the forefathers of this country, and should be used for the benefit of our generation—but instead they have been used to force the common people into debt and a condition little better than serfdom.

For some time we have been repeatedly told that these depression occurred and re-occurred in cycles and that they were unpreventable—but such is not the case. Depressions are all man made and all engineered by the money mongers of this world. True, they find it profitable to let credit out for a few years, only to strike out without warning at an unexpected time.

It is not the fact that depressions should occur is when there is insufficient product to meet the demand of the people, and not when the value is too small to meet the necessities of life. We are all familiar with the effort to raise prices by the destruction of coffee, cotton, the restrictions on the raising of beef and wheat, when the people are crying for the very thing which is being destroyed—namely, food and shelter. It is a wonder some far sighted lumberman did not burn the virgin forests to raise the price of lumber.

MEMBERS OF VILLAGE COUNCIL HAVE LONG SERVICE RECORD

It was in 1927 that S. J. Garrett was first elected to the Village Council, and in 1930 he was appointed mayor, which position he has held for the past six years.

Alex Reid was elected as a councillor in 1928, and as he held that position for the past eight years. Alex Flaws was elected to the council in 1930 and he commences on his seventh year of service in 1936.

Alex Reid was appointed secretary-treasurer of the Village in 1937 and has served in this capacity without interruption for the past six years. Mr. Reid was also appointed secretary-treasurer of the Carbon School District the same year, and he still holds that position at the present time.

KING INTRODUCES RECIPROCITY TREATY

OTTAWA—The dream of one Canadian government after another for 70 years became a reality in the House of Commons Tuesday when Premier Mackenzie King introduced the Canadian-American Reciprocity Treaty and proposed its ratification.

The prime minister stressed the mutual advantages to be gained by both countries in trade promotion. He predicted it would be only the initial step in that direction, that wider cooperation would be gained in the future when the three-year life of the treaty expires.

DO NOT TREAT FROSTED SEED WITH FORMALIN

With much frosted grain to be sown this year in Alberta, the University has conducted experiments which show that vitality of this frozen seed is greatly lowered by the use of Formalin in seed treatment. They suggest treatment with one of the dust germicides, such as Ceresan or Lysoform.

IN MEMORIAM

In kind remembrance of Norman Little who passed away on February 23, 1936.

"Long days, long nights, he bore his pain,
To wait for cure, but all in vain;
Till God Himself knew what was best,
He took him home and gave him rest."

Ever remembered by a friend,
IDA WARD.

HOUSE ADJOURNS TO MONDAY

EDMONTON—To clear decks for the budget, which will be brought down on Monday next, the legislature at the conclusion of Tuesday's sitting adjourned until next Monday, when Premier Abernethy announced the budget and estimates would be ready.

There would be no sitting of the house Wednesday in any case, as it is Ash Wednesday, the beginning of Lent and a day on which the House never sits.

CHAS. GUYNN ELECTED IN DIVISION ONE

Has Majority of Only Seven Votes

At the election for Councillor in Division One of the Municipal District of Carbon No. 278, held last Saturday, Chas. Gwynn was the winner, when he defeated his opponent, Thos. J. King by seven votes.

SMALL VOTE CAST

At the election for Councillor in Division One of the Municipal District of Carbon No. 278, held last Saturday, Chas. Gwynn was the winner, when he defeated his opponent, Thos. J. King by seven votes.

There were only 47 votes cast in the election, or approximately one-third of those whose names appeared on the voter's list. Cold weather and blocked roads no doubt had much to do with the small vote polled.

At the Carbon poll, T. J. King received 12 votes to his opponent's six. However at the Gamble poll King polled only eight votes while Gwynn had 21. The final count was Gwynn, 27; King, 20.

The new Municipal Council will now consist of G. Weber, J. J. O'Hausser, Chas. Gwynn, H. Offer, H. J. Crowell, and J.R. McEwan.

CARBON OLD TIMERS DANCE TO BE HELD FRIDAY NIGHT

After having been postponed from February 14th to February 28th, the Carbon Old Timers have decided to put on the Carbon Old Timers dance on Friday night, regardless of weather conditions. So, be on hand on Friday night, for a real enjoyable time.

The Prairie Ramblers 7-piece orchestra will furnish the music and these players will play 14 different instrumental pieces during their program of dance music.

Lunch will be served at midnight and the admission to the dance is \$1 per couple.

DOUGLAS PLANS VISIT IN MARCH

LONDON—Major C.I. Douglas, architect of the Social Credit movement, said Tuesday it is "fairly certain" he will visit Alberta next month to confer with Premier William Abernethy, elected last year on a Social Credit Platform in that province.

"I have nothing to say as to what I think of the kind of Social Credit movement as applied in Alberta," Major Douglas replied when asked for comment. "The comment had better come from those who are in control."

Major Douglas said he would wait to hear further from Premier Abernethy before planning his departure.

HOUSE ADJOURNS TO MONDAY

EDMONTON—To clear decks for the budget, which will be brought down on Monday next, the legislature at the conclusion of Tuesday's sitting adjourned until next Monday, when Premier Abernethy announced the budget and estimates would be ready.

There would be no sitting of the house Wednesday in any case, as it is Ash Wednesday, the beginning of Lent and a day on which the House never sits.

PATTERN 5439

You're sure to win prizes—and loud acclaim—with this beautifully designed alphain whose easy making will surprise you. It's the simplest sort of pickup work to carry with you, for you make it a square at a time, following clearly illustrated directions for the key square. Even though you're nothing but a scrap of wool on hand—and the wool may be of different weights, too—you can obtain a lovely jeweled effect just because each square is different. You can make an attractive pillow, too.

In pattern 5439 you will find complete instructions for making this alphain shown as well as pillow tops and chair sets; an illustration of the block and of the stitches needed; material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winning Newspaper Union, 170 West 42nd Street, E. Winnepeg.

There is one Alie Brooks pattern book published.

Do You Ever Wonder

Whether the "Pain" Remedy You Use is SAFE?

Ask Your Doctor and Find Out

Don't Entrust Your Own or Your Family's Well-Being to Unknown Preparations

THE person to ask whether the preparation you or your family are taking for the relief of headaches is SAFE to use regularly is your family doctor. Ask him particularly about "ASPIRIN".

He will tell you that before the discovery of "Aspirin" and "pain" remedies were advised against by physicians as bad for the stomach and, often, for the heart. Which is food for thought if you seek quick, safe relief.

Scientists rate "Aspirin" among the fastest methods for relieving the pain of rheumatism, neuritis and neuralgia. And the experience of millions of users has proved it safe for the average person to use regularly. In your own interest remember this:

"Aspirin" Tablets are made in Canada. "Aspirin" is the registered trademark of the Bayer Company, Limited. Look for the name Bayer in the form of a cross on every tablet.

Demand and Get "ASPIRIN"

Important Engine Tests

Canard White Star Supermarine "Queen Mary" Subjected To Rigorous Inspection

Preparations are being completed for the important engine tests to which the new Canard White Star supermarine "Queen Mary" will be subjected before she leaves the basin of John Brown's shipyard, Clydebank, Scotland.

The rigid task of inspection, under the joint supervision of company and shipyard experts, is expected to occupy several weeks, although preliminary surveys have already been completed. The four 35-ton propellers have already been temporarily disconnected from their 227 foot long shaftings, and funnels, and boilers lighted, but every part of the ship's machinery will undergo minute and severe tests in the yards before the actual speed trials, which will take place beyond the Heads of Arran, in the Firth of Clyde. Prior to proceeding on her speed trials the "Queen Mary" will leave Clydebank about March 24 next and proceed to Southampton where she will enter the new Southampton drydock to be prepared for the trials some weeks later.

The speed trials of the "Queen Mary" will be conducted with the utmost secrecy. Not a single soul of the 560 carried aboard, except Sir Edgar Britten, the commander, will know just when the tests have actually begun or ended.

During the speed trials messages will be exchanged between the commander and the engine room in code instead of by telephone, giving details of the vessel's speed and behavior. These messages will be recorded in cipher on perforated tape, similar to quotations on a stock ticker.

For fear that the supermarine may swamp yachts and houses on shore during these special manoeuvres, the speed trials of the "Queen Mary" will be carried out beyond the Heads of Arran in the Firth of the Clyde instead of over the usual measured mile at Skelmorlie, off the Ayrshire coast, or in Wemyss Bay.

The "Queen Mary" will spend over her trial course 25 times, anchoring at night off the Tail of the Bank Laker, on leaving the Clyde, three further tests will be carried out. Stern tests to ascertain the ship's speed while going hard astern will be made before the vessel's departure.

Manoeuvring trials will then be carried out to find the area required and the time the liner will take to turn completely around. Later there will be consumption trials in the Atlantic to discover the oil fuel consumption per 24-hour period.

The Utmost In Efficiency

Firm In Moravia Has Great Idea To Save Time

Heads of a concern in Zlin, Moravia, and their secretaries are to have their "office" in an elevator. Their office will be nearly 20 feet square, and the touch of a button will be enough to send it to which ever floor of the tall building it may be needed. There the doors will be opened, and the elevator will remain until all the required business has been transacted. Then the staff will resume their "travels". The amount of time saved by taking the fully equipped office to where it is wanted, instead of having to take everything to each office, is estimated to be great.

An Exclusive Alice Brooks Model

PATTERN 5533

Even the butterfly's enamour of his little charmer's newly crocheted frock—a style that's winsome and dainty for sets of 4 to 8. So easy to crochet, too, in a simple all-over pattern, topped by yoke of plain mesh which serves as collar. Use white or cream. (See page 4 for details.)

In pattern 5533 you will find directions for making the dress shown in sizes 4, 6 and 8; illustrations of it and of all stitches used; material requirements. Senate To Co-optate

Rt. Hon. Arthur Meighen Says Both Parties Will Work For The Good Of Canada

Conservative members of the senate, now in a majority in the upper house, will not employ their numbers to the embarrassment of the governmental minority, but will operate sincerely, diligently and without prejudice in reviewing legislation. This was the assurance given to Senator Raoul Dandaneau, government house leader, by Rt. Hon. Arthur Meighen, conservative leader, in the senate.

In the past five years the Liberal senators had worked earnestly and helpfully with their Conservative colleagues. The latter were now in a position where they could reciprocate and Senator Meighen assured Senator Dandaneau that this assistance would be forthcoming.

He believed all members of the upper house appreciated the necessity of co-operating for the good of Canada and was confident the senate's deliberations would redound to the credit of parliament and the country.

Mr. Meighen's observations came at the close of a brief speech he delivered in the debate on the address in reply to the speech from the throne.

Move Radio Station

Transport Station 70 Miles With Only Four Hours Interruption

The record-breaking feat of transporting an entire radio broadcasting station a distance of 70 miles in slightly under four hours "off the air" was reported to Edmonton headquarters of the Canadian Airways Limited.

The job was completed by Pilot Archie McMullen and Ronald Ingey, operator of the Canadian Airways commercial station at Port Rae. The entire equipment was transplanted to the permanent camp of Major L. T. Burrows' mining Properties at Yellowknife river, north shore of Great Slave lake.

For the past three years, Mr. Ingey has kept the Port Rae station in operation without a break. It is a 250-watt station and the movers battled 40 and 50-below-zero weather in making the switch.

SUNDAY SCHOOL LESSON

FEBRUARY 23

PEOPLE BEFORE PROPERTY

Golden text: No servant can serve two masters; for either he will hate the one, and love the other; or else he will hold to one, and despise the other. Ye cannot serve God and mammon. Luke 16:13.

Lesson: Luke 8; Devotional reading: Colossians 1: 9-18.

Explanations And Comments

The Gerasene Demoniac, Luke 8: 26-30. A boat with Jesus and his disciples was beached one day on the eastern shore of the lake, when a man, who had been driven out of his mind by the Gerasenes, facing Jesus, at once met by a naked demoniac whose whole was in the tomb. Such tombs were caves, either natural or hewn out of the rock, which were used as burial places. They were always outside the cities, usually in lonely regions, and because they contained the bones of the dead were regarded as "unclean". Syrians to-day believe that evil spirits haunt such places.

The man fell down before Jesus, crying, "What have I to do with thee, Jesus, thou Son of the Most High God?" The Most High God? It is a heathen term, but the Jews found several times in the Old Testament and Phenician inscriptions that it was used as a name for the man was suffering it probable from his violent paroxysms, and he was found having been bound with chains which he would break as he escaped into the wilderness.

Jesus said to him, "What do I want to do with thee? The man cried as Jesus said: 'The unclean spirit' leave him. 'What is he made of?' Jesus asked. 'To calm the man and gain his control by asking him to name the man to make him realize his own identity.' 'Legion,' the man answered. 'For many demons were driven out of him.' Luke adds. Then the demon, so Luke's account states, entreated Jesus not to command them to depart into the wilderness, but to let them enter the herd of swine grazing on the mountains and Jesus gave them leave. Jesus uttered the word 'Go' or 'Depart' according to Matthew's account.

The next thing that happened was that the man begged to go with him, but Jesus told him to return to his own home and declare what great things God had done for him. The man obeyed and published the news everywhere.

The keepers of the swine led to return their loss to the owner of the country round about, whereupon the people, clothed in the robes of Jesus, fled to the lake and were drowned. This note may have been the first herd of swine driven into the lake by his frantic cries. Many persons, rightly believing with him that "nothing can be good in him which evil is in me," are troubled by this loss to the owner of the herd. The answer is that the good will outweigh the evil, and the whole country side by the cure of one so dangerous far away outweighed the loss to the owner.

Many persons, rightly believing with him that "nothing can be good in him which evil is in me," are troubled by this loss to the owner of the herd. The answer is that the good will outweigh the evil, and the whole country side by the cure of one so dangerous far away outweighed the loss to the owner.

The keepers of the swine led to return their loss to the owner of the country round about, whereupon the people, clothed in the robes of Jesus, fled to the lake and were drowned. This note may have been the first herd of swine driven into the lake by his frantic cries. Many persons, rightly believing with him that "nothing can be good in him which evil is in me," are troubled by this loss to the owner of the herd. The answer is that the good will outweigh the evil, and the whole country side by the cure of one so dangerous far away outweighed the loss to the owner.

2 PRIZES OF \$50.00 EACH
10 PRIZES OF \$10.00 EACH
10 PRIZES OF \$5.00 EACH
250 FANCY SEWING BOXES
And containing an assortment of Coats' and Clark's Threads.

If you sew, you'll know! Get an entry blank from your favourite store and post it on it what you think the other needle would say of Coats' and Clark's 6 cord Spool Cotton. . . so firm and dependable, no matter how fine in size—strong and smooth and even. There are 272 chances for YOU to win. Send in your entry. YOU may be one of the lucky winners.

—The 5 Standards of Excellence—

1. IN COATS' and CLARK'S 6 CORD SPOOL COTTON, 6 Cord Gals Construction makes every thread, however long and dependent.
2. Strength that holds seams secure through years of use and laundering. There is no starky cutting to give only temporary strength which weakens in washing.
3. Smoothness to withstand friction of machine and hand.
4. Elasticity to provide seams that will not break or pucker.
5. Verseness which permits easy, rapid movement through the eye of the needle under tension.

Lunch Service For Coach Passengers

Restaurant Service On C.P.R. Lines At Nominal Prices

The institution of a restaurant lunch service at nominal prices for passengers in day coaches and tourist cars on the company's fast transcontinental trains "The Dominion" between Toronto, Winnipeg and Vancouver has been announced by Passenger Traffic Department.

The new service constitutes a distinct departure and supplements the work of an efficient organization built up through years of catering to the needs of the travelling public. The new service will be available for future passengers in day coaches and tourist cars will, through the Train News Agent, be able to secure appetizing quick lunch foods from the dining car. These lunches will include meat pies, sausage rolls, sandwiches, bread and butter, pies and beverages.

The Canadian Pacific Railway meal service now includes the dinner which has long been the standard for efficiency in catering, the self-service kitchenettes with which tourist sleepers are equipped, and the widely known and popular station lunch counters and restaurants at all principal points in Canada, and the latest quick lunch service now announced.

Temple Viper For London Zoo
A temple viper—a reptile which for 3,000 years has been worshipped by man from sheer fear—was introduced at the London Zoo from the Malay States. In the jungles temples are dedicated in the worship of this viper. It will kill a man in half an hour, and science knows no cure.

C. C. F. MOTION IS DEFEATED BY A LARGE MAJORITY

Ottawa.—The King government emerged from its first test of strength in the House of Commons with a majority of 200, resulting from Liberals, Conservatives and Social Creditors.

By a vote of 208-4 the house turned down an amendment to the address in reply to the speech from the throne and then passed the main motion without division. The amendment, proposed by J. S. Woods, W.C.F. leader, condemned the government for not presenting a legislative program designed to ameliorate distress conditions and distribute wealth among the people.

Each of the seven C.C.F. members voted for the Woodworth amendment and they were joined by Agnes Macphail, who was elected to the house as a United Farmer of Ontario-Labor. Opposed to it were 17 Social Creditors, 31 Conservatives and 160 Liberals.

It has happened only half a dozen times in parliamentary history that an address motion has been divided on division and it was believed the government's majority of 200 in turning back the amendment was one of the largest in circumstances of that kind.

Liberals withdrew from the address debate, most of the votes being taken by C.C.F. and Social Credit speakers.

Charges that wheat exporters in Winnipeg rushed to the telephone to secure orders from Liverpool to take advantage of regulations of the wheat board will be investigated by the parliamentary committee that probes operations of the board.

E. E. Peirley (C.C.F.) relayed the allegations to the house and gave his opinion they were correct. Finance Minister Dunning said they would be included in the parliamentary investigation but added his opinion they were groundless.

According to the charges, the telephone orders were presented the morning after Argentine boasted wheat prices to farmers 20 cents a bushel and before the Winnipeg exchange jumped its full limit of three cents. A regulation of the wheat board enabled exporters to obtain night orders from Europe at a quarter to half-cent above the closing price to prevent them from being placed in a tight corner to cover their short positions, he claimed.

According to the charges, telephone wires between Liverpool and Buenos Aires boosted its prices and Winnipeg export. Exports, it was claimed, saw their opportunity to double their European orders, which, because of the board's overnight regulation, could be filled below the market price.

The Saskatchewan Conservative cabinet efforts would be included in the parliamentary investigation to establish whether the European orders were genuine and learn when they were contacted.

Inquiry Into Dismissals

Premier Announces Probe In Connection With Speaker Casgrain

Ottawa.—An inquiry into the dismissal and employment of House of Commons help will be made by the committee on privileges. Prime Minister Mackenzie King announced in the house.

The inquiry will take place later in the session after the committee has been set up and a deputy speaker has been appointed.

Mr. King made his announcement after Conservative Leader Bennett charged a number of employees had been dismissed in breach of the privileges of the house.

Mr. Bennett agreed to the proposed investigation, providing Speaker Casgrain tabled all papers in connection with dismissals under his regime. Mr. King said Mr. Bennett would have to move for the papers in the regular way.

Poet Laureate Returns Home

London.—John Macfie, poet laureate of England, found no inspiration for his muse in the United States, he said upon his return to Southampton from the liner Majestic. He also said he did not intend to write a coronation hymn for Edward VIII.

Receive Life Sentence

Als-En-Provence, France.—The three men charged with the assassination of King Alexander of Yugoslavia, and Louis Borha, French foreign minister, were sentenced to life imprisonment here.

Grow Forage Crops

Change Needed To Place Agriculture On Sound Basis

Edmonton.—Sowing of earlier maturing grains and growing of more forage and grass crops are required to place agriculture in Alberta on a reasonably sound basis in the future, H. A. Craig, deputy minister of agriculture, told the Alberta Dairy-men's Association on the second day of the annual convention here.

Addressing the dairy men, Mr. Craig, of the University of Alberta, on "Young Men in Agriculture Today" and a review of the activities of the National Dairy Council during 1935, given by A. C. Frazer, manager-secretary, Ottawa, were heard.

A total of 25,000,000 acres were seeded to grass in the United States last year, an example Alberta farmers could well take notice of, Mr. Craig said.

A new grass, Creeping Red Fescue, successful in developing permanent farms here, was found to have a high "carrying capacity" for feeding cattle but did not rank high as timothy in palatability. It was a good turf grass. The speaker stressed the value of growing grass and forage crops to maintain the fertility of the soil and prevent soil drifting.

May Sell Phone System

Reported Alberta Has Received Offer From Financial Interests

Edmonton.—An offer from New York or British financial interests for Alberta's \$15,000,000 provincial telephone system is expected by the government, states Hon. W. A. Fallick, minister of railways and telephones.

A survey of the system was made last year by a committee of engineers, who had no hesitation in expressing their commendation, particularly of the Calgary exchange and the accounting system of the department.

"I have not heard from them since they were here on January 23. I have every expectation of receiving an offer," said the minister.

"What price would likely be asked by the government?" he was asked. "I don't see how the government could entertain anything less than \$15,000,000, though I am not saying that would be accepted. But I feel that an offer of anything less would be only wasting time," said the minister.

Abolish Slavery System

Conditions In Crown Colony Of Hongkong Not Satisfactory

London.—J. H. Thomas, secretary for colonies, renewed in the House of Commons his promise to abolish the Mul Tai, or slavery system, in the crown colony of Hongkong.

Graham White, Labor, asked what the government intended to do about the "unsatisfactory condition disclosed by the report of the committee of investigation."

Mr. Thomas said he intended to accept recommendations from the administration of the crown colony before taking action.

"No one could read the report without dismay, and I have no hesitation in saying that definite promises were made very many years ago that we would try to abolish it. I will try to accomplish that," said Mr. Thomas.

The Mul Tai system permits the purchase of Chinese children, male or female, for use as domestic slaves.

Legion Pilgrimage

3,600 Have Already Registered To Make Trip

Ottawa.—Registrations of ex-servicemen and dependents to the Canadian Legion's pilgrimages to Vimy Ridge in July number 3,600, with the deadline one month away, said Alex Ross, Legion president of the organization, said here.

Due to the problem of assigning vessels to the trans-Atlantic crossing no applications for inclusion in the pilgrimages will be considered after March 12, the date fixed following representations from companies concerned.

A Double Holiday

Edmonton.—Growing in popularity Boxing Day, which is the day after Christmas, will be a public holiday for the future in Alberta, under the terms of an amending bill which is now before the legislature. The measure which has received first reading, is an amendment to the Interpretation Act to provide for the double holiday at Christmas. 2138

Remain British Territory

Argentine Warned Falkland Islands Are Not Their Property

London.—The Falkland Islands, off the South American continent, remain British territory. In a written answer to a House of Commons question, Anthony Eden, foreign secretary, said Great Britain had warned Argentina that the issuance of postage stamps showing the islands to be Argentine property "can only be detrimental to the good relations of the two countries."

Addressing the House, Eden, of agriculture, University of Alberta, on "Young Men in Agriculture Today" and a review of the activities of the National Dairy Council during 1935, given by A. C. Frazer, manager-secretary, Ottawa, were heard.

A total of 25,000,000 acres were seeded to grass in the United States last year, an example Alberta farmers could well take notice of, Mr. Craig said.

CUT ELECTION COSTS

Mr. Harry Butcher, former M.P. for Lancashire, Manchester, who has been commissioned by the Dominion Government to investigate the problem of how to cut election costs to the advantage of the candidates and the Canadian Treasury. Mr. Butcher will go to the Mother Country to study the system in operation there.

Oil Sanctions

Would Be Effective If U.S. Would Limit Exports

Geneva.—An oil sanction against Germany, if not being undertaken by the League of Nations, would be effective if the United States limits its exports to the warring nations to the normal level prior to 1935.

In its official report after weeks of deliberation, the committee expressed the opinion that if the embargo were universally applied and under conditions prevailing now, it would become effective within about three or three and a half weeks.

But, the experts expected, if the sanction is imposed by league states alone, the only effect it would have on Italy "would be to render the purchase of petroleum more difficult and expensive."

Germany's Secret Police

Decree Issued By Hitler Makes Power All-Powerful

Berlin.—Chancellor Adolf Hitler's katapo, or secret state police, was made all-powerful in the reich by a decree issued ordering all administrative officials, from government heads down, to obey katapo orders. Enormous power was believed concentrated by this decree in the hands of Air Minister Gen. Hermann Wilhelm Goering, who controls the katapo.

The law orders district governors to take commands from secret police headquarters, which will, in return, supply the local police departments with such directions as may be desirable.

The effect of the decree is to ally the secret police more closely with Germany's civil administration.

ROYAL SONS FOLLOW LATE KING'S CASQUET

Satisfied With Progress

Great Britain Prepared For Any Attacks From Air

London.—The admiralty is alert to the question of defence against modern aerial attack. Viscount Monckton, first lord of the admiralty, told the house of lords that in the last few years combined air and naval manoeuvres have been held on a large scale as defensive preparations against possible attack from the air.

The manoeuvres, he said, had revealed valuable information for naval construction, both with regard to anti-aircraft guns and hull construction.

Regarding the problem of bombs versus battleships, the first lord of the admiralty said that all countries shared the opinion that air attack had not rendered the battleship obsolete. No country was abolishing capital ships.

The immense offensive power of aircraft was not being underrated but Lord Monckton warned against exaggeration of its value. The bomb was a new product, he said, and imposed the necessity of having guns fired vertically as well as horizontally.

We are more than satisfied with the progress we are making with our anti-aircraft guns," concluded Lord Monckton.

Will Retain Colonies

Britain Not Handing Over Any Part Of Empire To Foreign Powers

London.—Britain is not handing over any part of her empire to foreign powers. Two specific questions on the point were put to J. H. Thomas, secretary of the colonies, in the House of Commons, one from a Conservative and one from a Liberal.

Mr. Thomas, formerly Dominion secretary, answered both questions in the affirmative. "The British government," he said, "has not considered nor considering handing over any British colonies or territories under mandate." This statement provoked long cheers from government benches.

Negotiations were initiated by Mr. Thomas this year in the hope of securing a census, estimated at \$200,000, could be avoided.

Subsidies granted by the Dominion to these provinces will be governed by this census. In the other provinces a census is required only every 10 years.

PUBLIC WORKS PROGRAM AS A RELIEF MEASURE

Ottawa.—The government is working on an extensive public works program as an unemployment relief measure, it was learned. The main estimates brought down were intended to provide for the cost of government under normal conditions and extraordinary expenditures due to existing circumstances will be met in other ways.

Consideration will be given to proposals for public works which would directly or indirectly produce revenue. The government is not expected to agree to any considerable public works which would not produce revenue, such as public buildings.

Among the type of works said to be favored are better improvements, road building which would encourage tourist traffic and perhaps assistance to the railways to enable them to increase their revenues and compete better with improved travel conditions.

At the recent Dominion-provincial conference it was suggested the Dominion and provinces join not only in the building of new highways but in roads designated as feeders to this highway. It is expected this proposal will be given particular study.

Will Take Prairie Census

Census Of Three Western Provinces To Be Taken This Summer

Ottawa.—A census of the three prairie provinces will be taken this summer, Hon. W. D. Euler, minister of trade and commerce, announced. Under the constitution Manitoba, Saskatchewan and Alberta are entitled to a census every five years.

Subsidies granted by the Dominion to these provinces will be governed by this census. In the other provinces a census is required only every 10 years.

Negotiations were initiated by Mr. Thomas this year in the hope of securing a census, estimated at \$200,000, could be avoided.

To Relieve Pain

Cobra Venom Is Said To Be Used Successfully

A new healing principle which trains pain into the habit of staying away, discovered in cobra venom, is reported in the proceedings of the National Academy of Sciences by David Macht, of Baltimore.

Dr. Macht sought in venom a non-habit-forming substitute for morphine. He found something which seems to give the habit to the pain instead of to the person.

The habit is in most cases for the pain to go away more and more with repetition of less venom to keep it away.

The new medicine is a dried crystalline secretion of cobra poison, known as the scales of the venom. Dr. Macht and collaborators used it on 115 persons in Baltimore. All were long-time sufferers from incurable pain, and most of them had run the gamut of pain-relieving drugs.

There were favorable results for 86.7 per cent. Nine cases got no relief at all. Twenty-three got only slight relief.

"The usual therapeutic procedure," Dr. Macht reports, "was as follows: A dose of two or more milligrams (of venom) was first administered to ascertain whether the patient had any idiosyncrasy to it."

If no undesirable effect was noted, a full dose of five minute units was injected the following day. The same amount was injected several successive days until a definite physiological effect (i.e., relief of pain) was noted.

The dosage was then cut down in frequency, injections being given on alternate days. Later patients who had been treated with one or two injections a week.

"In this respect cobra venom was strikingly different from morphine, which usually leads to habituation, requiring increasingly frequent dosage."

A powerful pain-relieving effect was undoubtedly produced in a large number of cases. Such an action was noted in some of the most intractable conditions as for instance in malignant tumors of jaw, spine and pelvic bone.

Church And State

Separation Of Anglican Church From State Will Be Defied, It Is Said

Action will again be delayed at this session of the British parliament on separation of the Anglican Church from the state, which members of that communion desire it was indicated recently.

Instead, the formal proposal, defended by the Rt. Rev. Herbert Henry Benson, Bishop of Durham, was referred to a meeting of churchmen to be held next summer.

The Bishop of Durham argued that the spiritual interests of the church, as well as its formal reorganization, required separation from the state.

Separation of the church and state would mean that the Edward VIII. would cease to be "Defender of the Faith," the title English kings have held as heads of the state church since the days of Henry VIII.

Agricultural Problems

Active Projects Being Conducted On Experimental Farms

During 1935 a total of 105 active projects relating to practical problems of agriculture were conducted on the 184 illustration stations operated by the Dominion Experimental Farms. At certain of these stations the work is directed to a specific crop, as in the case of the raspberry work under way at Mission, B.C.; the cranberry growing trials at Port Mouton, N.B.; and the herring fishery at Badville, Sask.

Two Lucky Provinces

Saskatchewan and Manitoba of the western provinces were spared any abandonment of railway mileage since the Duff railway commission carried out its investigation two years ago, according to figures in "The Financial Post." British Columbia had 48,800 miles and Alberta six miles abandoned. Total in Canada abandoned was 572,600 miles.

Affected Their Memory

Lobsters, frozen for 3,000 years, have been revived and are now pursuing a normal existence, according to the claim of Soviet scientists. The only thing that is troubling them is that they cannot remember very clearly the lessons they learned at their mother's knees.

Since the British war there has spread in Great Britain an ultra-mild form of amnesia, called "varia minima," which is described as not being fatal, disfiguring nor pathologic.

BRITAIN'S NEW WONDER PLANE IN FLIGHT

Like a giant bird, this new Vickers-Wellesley long-range bomber glides through the air during a practice flight. Ordered for the Royal Air Force, this machine has many secrets, and it is the fastest, heaviest, and longest-ranged airplane in the world. The great wing span means more space for gasoline or freight; it has a retractable under-carriage, and a hatch for entry of the crew beneath the fuselage. The engine has special streamlining cowling, and it is claimed that the wings could be folded with talbots without collapsing.

Novel System Of Barter

Italian Scrap Metal For Tickets To Movies

Fifteen kilos of scrap iron is the standard price of a box seat at the cinema in Rome, ten kilos of scrap metal for the orchestra, and eight kilos for the gallery.

Patriotic film fans may be seen trooping up to the box office bearing packages and sacks of scrap metal in return for which they receive their tickets.

In other Italian cities the weight of scrap metal which will buy admission into movie theatre varies, but nearly all have inaugurated this novel system of barter in order to promote the government's campaign for scrap metal for the fatherland.

Young "Italians" and their still younger brothers, the "Sons of the Wolf," who are making intensive door-to-door canvasses for scrap metals, are now doing so with added zest because their work entails not only an act of patriotism for which they are lauded by the Fascist authorities, but also earns for them the right to see their favorite movies.

In Rome, one large group of boys track along a section of a street car track which workmen had left overnight. Laboriously but uncomplainingly they tug the heavy rail into the lobby of a downtown movie house and offer it to the fatherland—in exchange for free tickets at round.

Police were called but the boys were adamant, saying it was Italian for the soldiers in Africa. Some Fascist officers with a sense of humor caused the rail to be taken back by laborers and prevailed upon the management to let the crowd ofurchins see the film.

A Bird Lover

Canadian Post Says Robins Are The Friendliest Of Birds

Some birds have a sense of humor; the robin is a fine parachute jumper; robins are the friendliest of birds and blue jays are the most difficult to befriend, said Wallace Heywood Robb, the "poet of the Canadian birdlands" on one of his periodic visits to New York.

His bird sanctuary, called "Abbey Down," is one of the best known on the North American continent. He discovered the American crow, or fish hawk, was a parachute jumper. Nobody believed him until he caught a picture of an crow making a "dead stick" landing.

"The crow flies over its nest and then stands almost still, winnowing its wings. Then all at once it hurls its wings into an almost vertical position and pops to earth. It usually makes its parachute descension from about six feet in the air."

Robb now thinks that after 10 years or so of careful listening and memory he really is getting some of the bird songs into poetry.

Wife: "What did you do when the poor man collapsed in the bar?" Husband: "Finished up his beer and rushed to his aid."

Criminals report that painting metal surfaces requires special care, not in preparing the surface and in selecting paint for perfect adhesion.

"I wish," she sighed, "that we lived in a house where everything was done by touchings." "And I wish," said her husband, "that I lived in a shirt that had buttons to touch."

Only three diseases cause more deaths in the world than do accidents of all kinds. 2128

Locates Metallic Bodies

Pipe Lined Lost Forty Years Detected By Magnetic Eye

A magnetic eye that can look through the ground and locate metallic bodies has been developed for the particular job of locating "lost" pipe lines.

It can locate pipes with an accuracy of less than one diameter of the pipe in a horizontal direction and can determine its depth with a few per cent. of the total distance. It was developed in the meter engineering department of the General Electric Company and recently tested in Schenectady, N.Y. It located pipes 100 feet from their supposed location and at a depth of seven feet. The pipes had been laid forty years ago and records of the location lost.

The detector consists of a very sensitive magnetic needle and a bar magnet which can be adjusted for horizontal angle and azimuth to neutralize the earth's magnetic field. The instrument is moved along the arc across the supposed location of the pipe, and deflections of the needle charted. Maximum deflection takes place over the pipe. Two such lines and points give the course of the pipe. The depth can be determined by passing a small current through the pipe and carrying the return wire at varying distances over the instrument until the effect of the current in the pipe is neutralized. St. Thomas Times-Journal.

Japanese Life Span Higher

Average For Women Two Years Greater Than For Men

The average age of life in Japan is longer than has been generally believed. For men it is slightly over 44 years, for women it is 46. These are two and three years longer than were expected. The figures were disclosed by the Board of Statistics in Tokyo in announcing its fifth life table, which has just been published. The figures are based on the 1930 census. The average death rate is 20 per 1,000 population, according to the table.

Squad Leader: "I heard the battalion commander called you a block head. Is that correct?" Rookie: "No sir, he didn't make it that strong. He just said, 'Put down your cap, here comes a wood pecker.'"

Nuts such as Brazil nuts, cashews, peanuts, pecans and walnuts contain from 45 to 70 per cent. fat, and protein from 10 to 25 per cent.

Making Ethiopians Quail

Italian Soldiers Grow Beards So They Will Look Fierce

The underbrush of the Ethiopian wilds is being mirrored on the chins of Italian officers and soldiers. Beards are the fashion and tens of thousands of them have converted pick-checked boys into men.

A visit to the Italian front is a hirsute revelation. You talk to what appears a bearded veteran with a beard about as long as his 21. A young, shaven captain, wishing to help transmit a dispatch, called in the brigade stenographer. The sten must have known the touch system because his beard covered the whole keyboard.

Officers and soldiers have summed up the advantages and disadvantages of beards in wartime. Advantages are:

- 1.—Shaving with dull razor blades is avoided.
- 2.—They make innocent-looking soldiers so fierce that Ethiopians quail before them.
- 3.—They aid clear thinking, because stroking the beard seems to pull thoughts from one's brain like sparks from the back of a stroked cat.

Disadvantages:

- 1.—They catch in the belts of machine guns.
- 2.—They are likely to be nibbled by Ethiopian gnats as one sleeps.
- 3.—They stand a good chance of being singed as one hovers over a camp fire on a cold night.

The Italian high command does not bother its head over the question of a formal regulation on beards. It simply suggests its shoulders and refuses to become seriously concerned.

The apparently is something contagious in beards. Many correspondents who went to the front by New York newspaper men, a London one, several Germans and Frenchmen, observed reasonably civilized, started the relatively large Amara with goat-like appendages.

Canadian Mounted Police

New Recruits Ask For Assignments In The Hinterland

Modern machines have worked great changes in the famous Canadian Mounted Police but the youngsters of the service still ask for assignments to far-off outposts where there is lots of space and not much else.

Sir James MacBrien, commissioner of the Royal Canadian Mounted Police, in Washington for a wild life conference, said that while the police agency was still mounted, its men usually rode other things than such.

Three hundred horsemen are used in the Canadian wilds where motorized automobiles, boats and aeroplanes can't penetrate.

Asked about the old slogan, "The Mounties always get their man," Sir James laughed.

"You people gave us that slogan, and I suppose we should thank you. But I don't strictly true, you know. One while one gives us the slip. The truth of the matter is, the woman gets our men. We've been losing our men through marriage."

A man enters the service at 21, but he's not allowed to marry for six years.

Despite the changes modern life has made in the service, young men enlisting still like the Yukon.

"It offers them adventure, the open country—and solitude," Sir James explained. "And it's a pretty life up there."

Canadian Cattle For Russia

Plan Is Suggested On Basis Of Part-Barter

G. G. Serkau of Montreal, said the Dominion government has under consideration his scheme to exchange annually 100,000 head of Canadian livestock for various commodities from Soviet Russia.

Among the products this nation would take from Russia under his scheme he listed agricultural chemicals, naval stores and such basic materials as ferrous metals not produced in Canada or any other part of the British Commonwealth.

Serkau said the main object of his plan was to find a buyer for the livestock and to arrange thereafter the best terms possible on a basis of part-barter.

"How's your wife getting along with her driving, Abe?" "She took a turn for the worst last week, Moe."

Experts are being asked to estimate the age of two human skeletons unearthed during an excavation at Hastings Castle, England.

"I wouldn't sit there, Jim—you're sure to get humbug." The Sydney Bulletin.

Promising Year For Export Poultry

Good Demand For Frozen Chickens On Ontario Market

"Possibly Canada has never enjoyed a more promising outlook in an export way for any agricultural product than in the case for Canadian poultry, particularly for Canadian chickens on the British market," states a recent issue of the Egg and Poultry Review, published by the Dominion Department of Agriculture. "There is, as a matter of fact, very little competition in the way of finished milked poultry, such as Canada should be able to supply."

"Britain herself is making very little effort in this direction while the foreign countries Poland and Hungary are the nearest competitors at present. Poultry from Canada and the other Dominions enters the British Isles duty free while that from other countries has to face a tariff of three pence, or six cents a pound. There is no recommendation in the recently passed Importation of the Canadian Exportation Commission on the Import of Eggs and Poultry of any change in the tariff on dressed poultry and no suggestion of quotas or other similar restrictions."

"What the British market wants is a healthy, fat chicken equivalent to the Canadian product of Milled A and Milled B. There is little advantage to Canada in shipping to the British market the relatively large quantities of finished poultry. Considerable damage was done last year to the reputation of Canadian poultry because of the relatively large quantities of Selected B and Selected C birds that were exported without any counterbalancing effect of higher grades in the same shipment."

Men With Crains

University Of Toronto Co-Eds State They Prefer Men Of Intelligence

"Give us men with brains, not brawn," clamor University of Toronto co-eds. A questionnaire submitted to a representative section of the women undergraduates revealed that the type of boy friend is definitely out.

They declared they want men of intelligence, capable of sane, logical action and able to express themselves lucidly in good English.

Other qualities sought: A romantic nature apart from conventional social poise and ease of manner, personal neatness, proficiency in dancing, a sense of responsibility not only in the classroom but in physical fitness, money and sophistication or experience of the world.

All agreed that the public enemies of women students were men with the life, chiselers, date breakers, heavy drinkers, lounge lizards and cheap talkers.

A minority insisted on dates owing or at least driving, automobiles.

Every Precaution Taken

Strict Examination Required Before Engineer Can Drive Train

At the present time, every person involved in the handling and operation of trains must pass a written examination on a set of rules consisting of more than 200 questions. And a 100 per cent. correct answer is the only one acceptable to the railway management before a person is permitted to engage in this task. These very precautions make the headlines "Train Collisions" a rare occurrence nowadays.

On the other hand, we have the modern motor car with the speed of a railroad train built into it and what are the requirements necessary for the majority of people to operate one?—practically nil.

Drive a car around a few blocks; stop and start on a hill, and probably a few other simple tricks in operation. Letter in Ottawa Journal.

A Penance Chair

A penance chair used to be kept in the church of St. Ignace, near Ferrydale. Bearing the date 1655, it had on the back two texts: "Husbands love your wives as let the church love herself." "If a husband and wife quarrel they were obliged to sit on the chair—which was divided in the middle by an arm—during divine service, with a white sheet over their heads.—Western Mail Cardiff.

They couldn't understand his reluctance to start at kindergarten until he learned kindly of his mother: "It will hurt very much when they enroll me."

Passenger: "I hope you don't swing around corners too fast! It frightens me!" Driver: "Just do what I do, lady. Shut your eyes."

FLEMING'S FOLLY

-BY-
LAWRENCE A. KEATING

SYNOPSIS

The story opens with Link Fleming addressing a meeting of Boone County cattlemen, called together with the object of forming an irrigation company.

Roper Klago, the boss of the Rango and nearby ranges, who seemed to approve the plan, but was really opposed to it, had forced Sook Turner, a derelict mining engineer, whom he gave his expert opinion in favor of the scheme, to reverse his earlier endorsement, and declare that irrigation in Boone county so far as Fleming's plan was concerned was only a new-fangled way to waste money.

The meeting terminates, but Buzz Hamilton and his sister, Helen, Link and Klago stay behind and Helen asks Fleming questions about his irrigation plan. This angers Buzz, who accuses Fleming of trying to influence his sister and as he asserts this she "spreads." Buzz shoots at Fleming in an uncontrollable fit of anger, but Buster Townsend, Link's foreman, is so close in the stomach, and Fleming is uninjured. Buzz is arrested and sentenced to three years' imprisonment.

Helen and Fleming form a partnership to provide irrigation for their own properties. Fleming goes home and studies the plans drawn by Turner to learn whether they could be adapted to a smaller scheme suitable for his and Helen's land, and is satisfied it could be done. Feeling that the light is there and there is an explosion that wrecks the house, burns it and the plans and renders Link unconscious. He is rescued from the blaze by an employee.

(Now On With The Story)

CHAPTER VII.—Continued

They turned to see a short man in a fur-collared overcoat pausing in the doorway. At recognition that she was a girl he quickly doffed his derby hat. The man was superficially wrapped in a long pointed nose and a sharp chin. He bowed gravely and came forward.

"You're Mr. Fleming, I guess? My name's G. I. V. Berrens. Traveling representative of the Western Improvement Company of Denver. I—er, heard about a project Mr. Fleming is interested in, and decided to come out to speak to him. I must have been on the way when this—er, regrettable incident occurred." He stood beside the recumbent rancher. "Mighty sorry, mighty sorry," he stated in a low, peculiarly husky voice. "Mighty sorry indeed."

Link could not resist having seen the man before. Berrens drew up a stool and offered it to Helen. Then looking down at the stand where the oil lamp was, he thrust back the long overcoat, apparently joining his little white hands in prayer. Rocking back and forth, heel-and-toe, he smiled again and shook his head.

"I—I am not selling anything, but I might—er, might suggest ideas, Mr. Fleming. So don't worry about that. Fact is, in your—ah, unfortunate condition of the moment, you may perchance be particularly amenable to my proposition."

Link's glance showed plain longing for the fellow to be gone. It had no visible effect on Mr. Berrens, however. Nodding and smiling from one to the other of them, and back again, he continued what sounded like a prepared speech.

"You are, I believe, interested in irrigation?"

"Right! At the Strand Hotel in Ravichie I chanced to fall into conversation with one or two townspeople. Mr. Otto Pieper, president of the bank for one. Ah—I gather that you have discussed the matter, discussed some irrigation project in common—together—which, one might say, is not thought highly of by other ranchers?"

"That's true, Mr. Berrens." The fussy little man exhibited a row of gold teeth. "Sir, the company I represent, the Western Improvement Company, is a powerful, well-financed concern. We are, as a matter of fact, interested in securing a small, interesting place where we can experiment. I am not trying to sell you anything, sir, except possibly an idea."

"Don't think I can afford even an idea now, Mr. Berrens. My ranch house—"

"Exactly!" Mr. Berrens beamed, his gold teeth gleaming. "This carbocation of your ranch house is, I assume, a severe blow to a man of your apparent financial standing. Nothing novel, eh? Mr. Fleming, when you are a sick man, sir, that's that a thing should happen in this day and age!"

A gentleman named Sook Turner was slain, I am told. Also, someone at the same time tried to kill you. This—er, fire seems to be of

secondary origin, do you think? At least, some miscreant seems to have placed dynamite in your stove.

"What I am getting at," he ended with dramatic suddenness and appropriate gestures, "is this: my company will purchase your ranch, sir. We won't want it for the cattle. We want it because Silver Creek provides an interesting opportunity to try irrigation and to study the results."

"But we intend—" Helen began. "With men trying to kill you at every turn?" Mr. Fleming, who not accept a fair price and leave the country?"

The bunkhouse became silent save for the muffled talk outside and the impatient stamp of horses' hoofs. Link scowled as he looked from Berrens to the girl, then into space. Disappointment welled in him at realization that all Boone County wanted to see the irrigation scheme fail—actually hoped it would fail. Sook one wanted it to the extent of attempting to kill him. The loss of the plan, the destruction of the ranch house—all this was warning enough. Could a man succeed in the face of such odds?

Thought of surrender was not a pleasing one. Link Fleming could not recall when he had surrendered.

Nevertheless there was a difference between being courageous and cowardly. He could sell out and go elsewhere, easily enough.

He gazed thoughtfully at Helen Hamilton, reared nearby, her graceful profile turned his way. Perhaps he would do her a service to scotch this scheme here and now. To persuade, plainly, meant trouble. His pulse sped and then warmly went through him. He wanted to avoid making trouble for her, trouble of any kind.

"How much for the Star Loop, Mr. Berrens?"

because that it might be worth while you have. I've been informed as to your land, however. I'll say five thousand for the land and the buildings, and your beef at the market price. That's just a rough idea, but we can work it out on a satisfactory basis, I'm sure."

"How about seventeen hundred acres of land that'll grow alfalfa and wintered?"

"Ha! As it isn't watered now, it isn't worth much. Fifty cents an acre, Mr. Fleming, and that's a very generous offer. Very generous, indeed!"

He thought a moment. With his steers and his sheep, he could run around ten thousand dollars. It was less than the place was worth, but that amount in cash meant settling all this. And the more he pondered, the more deeply convinced he was.

"Well, I'll not wear what stool to sell you. You shan't do it!" he exclaimed indignantly. "Why, Link, what makes you talk so?"

"Wait!" The girl rose swiftly. Her eyes were bright and her face flushed. "You shan't do it!" she exclaimed indignantly. "Why, Link, what makes you talk so?"

"But we can't get in any work now till Spring. That means the deal goes up. And Helen, I'd like to get you out of this. Maybe we'll both be better off—"

"Then you don't think we could build a dam?"

(To Be Continued)

Fire-Retarding Wood

Chemically Treated With Compound Wood Will Not Burn

Coinciding with the statement of United States builders and insurance brokers, the United States fire losses for 1935 amount of over \$100 million human lives and cost \$245,000,000, comes a report from the National Board of Fire Underwriters concerning an assurance that there is such a thing as fire-retarding wood. The wood tested by the Board was red oak and maple which had been thoroughly and uniformly impregnated in pressure tanks containing ammonium salts, a fireproofing compound which, it is not properly generally known, has actually been produced in Canada during the past two years. The treated wood is almost the same in appearance as ordinary wood but is a little heavier because of the salt content. It is easily toolled and takes varnish well.

The investigators of the Board tested the treated wood under conditions that sent untreated walls and floors roaring up in flames while the treated wood did not burn at all but, after a long period of exposure to the fierce heat was deeply charred. Not once, however, did the treated wood flame or fall the spark of combustion. The National Board of Fire Underwriters' final verdict was that the wood was non-inflammable.

Mr. CAFFEINE - NERVES gets thrown out

Tribal Sacrifice Dropped

Indian Medicine Man Could Not Find Pure White Dog

A bitter wail moaned mournfully in the caves of Cayuga and Seneca tribal longhouses on the Six Nations Indian reserve near Shusong, Ontario, as the braves concluded the "feast of the white dog," with ceremonial dances and incantations.

Thermometers registered slightly below zero in keeping with the tradition the festival he observed on the coldest night of the year.

Custom demanded a pure white dog, "without blemish or spot," he decided, but the Cayuga and Seneca medicine men could not find such an animal and dispersed, with the thanks of the tribe during the year.

Will Preserve Voices

Radio Broadcasting Commission Has Archive Of Speeches

Nucleus of a museum of sounds, preserving the voices of great figures and audible records of events that cannot be re-enacted, has been formed by the Canadian Radio Broadcasting Commission.

The archives of speeches and other sounds so far contain six addresses by the late King George and a record made at the first birthday party of the Dionne quintuplets.

For Farms

The total value of animals on 7,019 farmlands in Canada at the end of 1934 was \$8,427,567, an increase of nearly a million dollars over the preceding year.

A Lauder Story

Famous Scottish Entertainer Conveyed By Remark Of The King
Sir Harry Lauder, the famous Scottish entertainer, sang for the king and queen at the Palace theatre in London one night and later visited them in the royal box.

After leaving their majesties, Lauder met a friend just outside the door and said to him: "Good night, George."

"Good night and good luck to you, Harry," he heard from behind. Turning, he saw the king had followed him out. The monarch laughed heartily over Lauder's confusion—
